## ***Actis Tech offers ICT solutions for logistics sector***

Chennai, Jan 18: Actis Technologies has launched Information and Communications Technology (ICT) Solutions catering to the booming Shipping and Logistics Industry in India. The new range of ICT Solutions offered to the logistics industry is said to help simplify the complexities of logistics operations which include warehousing and distribution management.

Apart from Video Conferencing, Telepresence, Mobile Video Conferencing, Actis is also believed to provide Unified Communications to the Logistics Industry. Unified Communications enables seamless flow of communication with all forms of communication modes like telephony, chats, videoconferencing, mobilephones

under a single interface. Unified Communication Solutions uses the power of software to streamline communications between people and organizations, regardless of medium, platform, device, or location.

Abhimanyu Gupta, Director, Actis Technologies, said, "The new set of technologies Actis offers address firms' need to be able to manage information flows effectively and to integrate several logistics activities by including inbound and outbound transportation, distribution, warehousing and fleet management. This helps logistics service providers to dramatically reduce lost time in interactions and coordination and to streamline the product flows of their customer firms."
