

Actis Technologies ties up with BenQ to include DLP projectors in their product offering

Indian Audio Visual marketplace is finally ready for DLP projectors

Mumbai, 03 August, 2006

Actis Technologies Pvt Ltd, the leading audio visual and environment control solutions provider in India today announced its tie up with BenQ for their DLP projectors. This is a phenomenal development for Actis at a time when projectors are fast becoming a necessary part of the IT infrastructure resulting in growth of 58% in 2005 and the demand for DLP projectors expected to contribute significantly in the coming years.

Speaking on the tie-up Mr. Abhimanyu Gupta, Director, Actis Technologies said, "We provide maximum flexibility to our customers in terms of product choices. Our tie up with BenQ is a strategic move in this direction. BenQ Projectors provide extremely good picture quality which enhances the viewers experience and are the best DLP projectors available today."

The BenQ DLP Projectors offers a host of differentiators such as:

- Wireless connectivity to simplify set-up
- Sleek & stylish set-up
- Compact form & factor
- Crisp, deeper & clearer visual experience
- True to movie video performance

"BenQ is the worldwide leader in DLP projectors. Our decision to team up with Actis was unanimous as they are amongst the Top 3 projector distributors in India and they are also a leading AV solutions provider in the country" said Max Hsu, Business Head – CE, BenQ. "The share of XGA has been increasing year on year in India and we feel our wide range of XGA projectors which includes installation, mobile & professional series of projectors can enhance Actis' offering to their customers from the corporate, government and education segment" he added. "Actis' strong presence across India enabled us to choose them as our partner. This is in line with our growth plans" concluded Max Hsu.

DLP technology is a revolutionary display solution that uses an optical semiconductor to manipulate light digitally. It is a highly reliable, all-digital display chip that delivers excellent picture quality across a broad range of products including large screen digital TVs, and projectors for business, home and digital cinema. One of the biggest advantages of DLP projectors is their compact size and clarity of image. DLP projectors use light efficiently and provide a crisp and sharp picture which is especially important for business presentations which use slides, spreadsheets etc.
